TEAM HUB

A CRM for your team

Every employee — forms, requests, messages and analysis in one card. All history is kept forever.

For businesses with 10+ people and several locations

SOUND FAMILIAR?

A business knows everything about its clients. About its own team — whatever someone remembers

- Staff requests get lost in chats
- 1:1 talks are never written down
- Someone leaves — their history leaves too
- A new manager starts from zero

THE IDEA

Like a CRM for clients — but for your team

TODAY
Questionnaires in scattered forms
Requests lost in private chats
Reports: “drop the numbers in the group”
History lives in a manager’s head

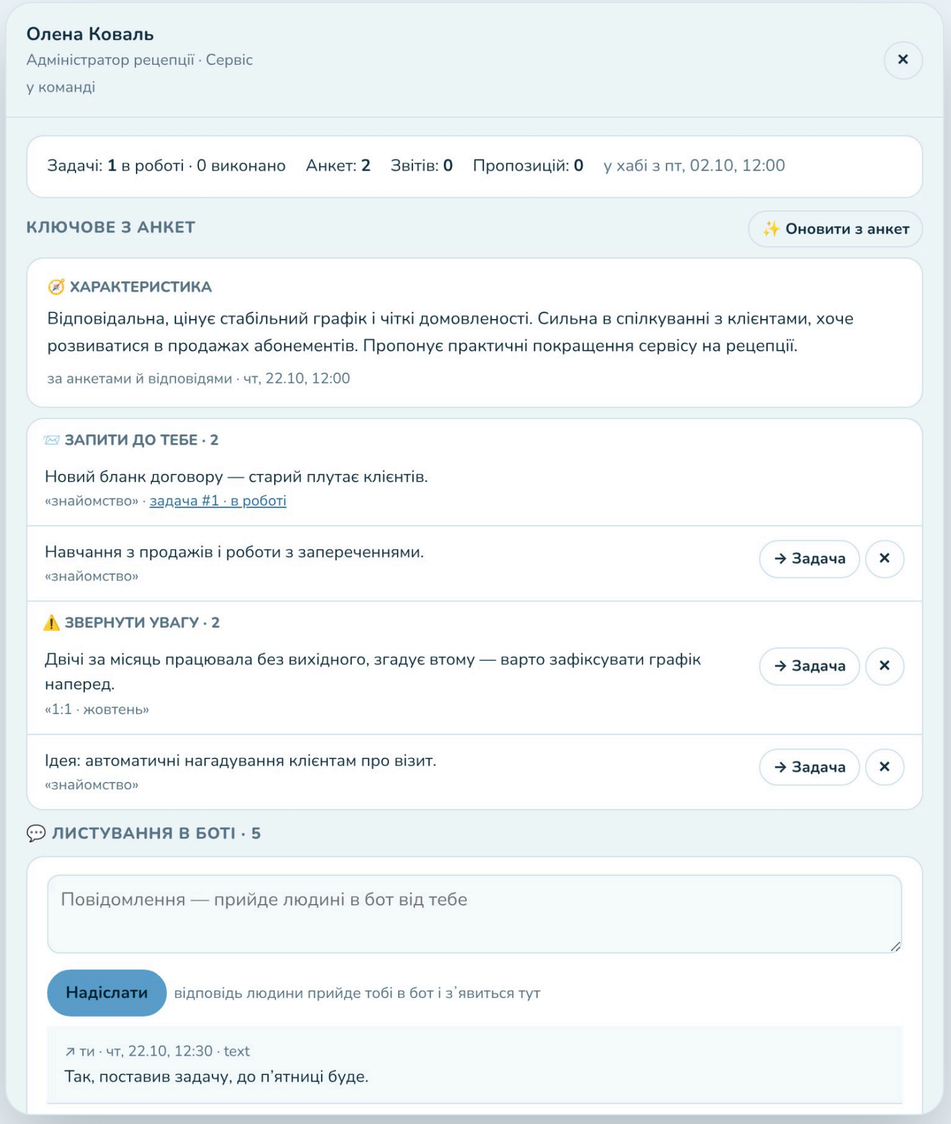

WITH THE HUB
Everything about a person in one card
Every request becomes a task
Reports arrive on schedule
History is kept forever

EMPLOYEE CARD

The whole person on one screen

Open a card and see who they are, what they asked for, what they answered and what needs attention.

- AI profile from all forms
- Requests turn straight into tasks
- What needs attention, in its own block

HISTORY

From day one — and forever

DAY 1

Intro form

contacts, experience, expectations

MONTH 1

1:1 meeting

what works, what gets in the way

MONTH 2

Request

“we need new equipment”

WEEK

Task

owner and deadline

DAILY

Reports

the day’s numbers

ALWAYS

Messages

every message in the card

Someone changes role, a new manager arrives — the context stays.

REQUEST ANALYSIS

The system reads the answers for you

AI turns a person’s forms and requests into a short profile: what matters, where the risk is, what they ask for.

Profile

Reliable, values a clear schedule. Suggests front-desk service ideas. Wants sales training.

attention Mentioned fatigue twice

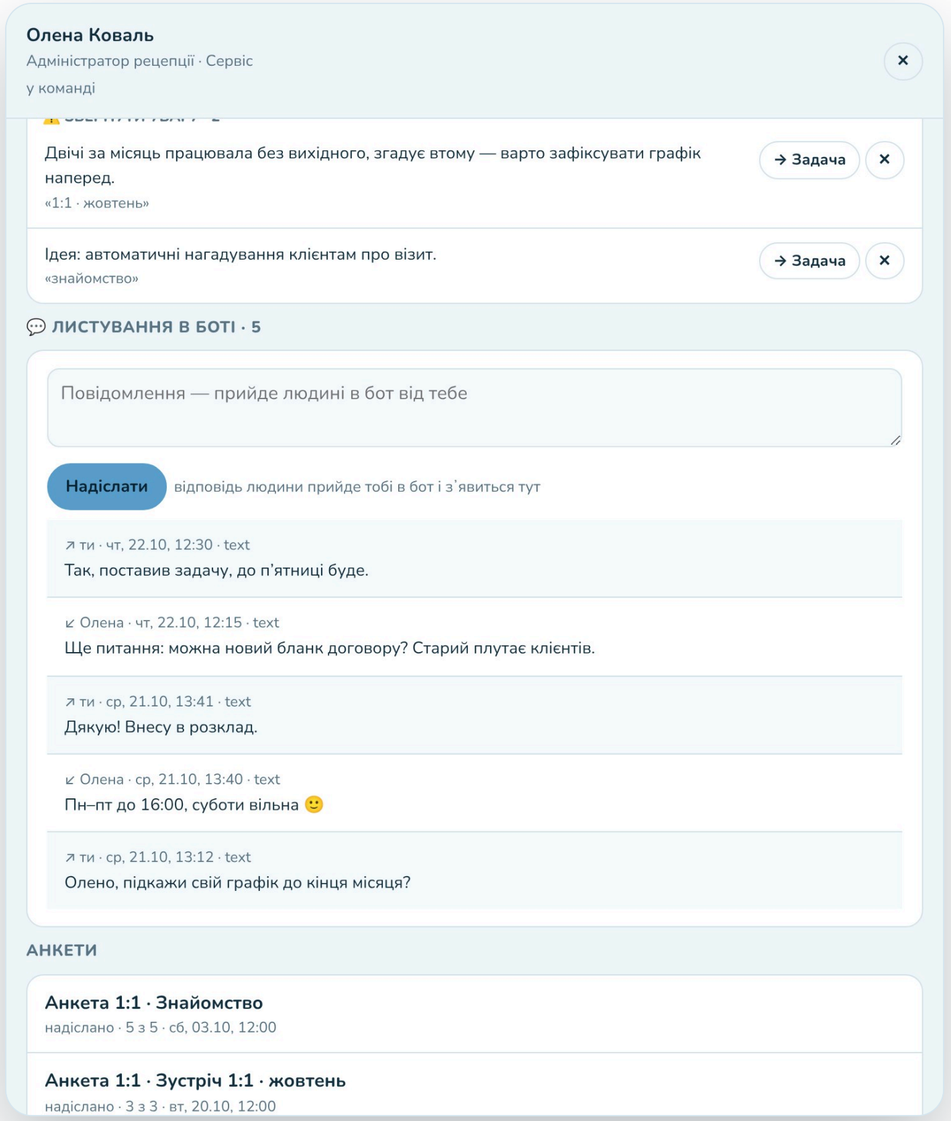

request New contract template

idea Visit reminders for clients

MESSAGING

Write from the card — they get it in Telegram

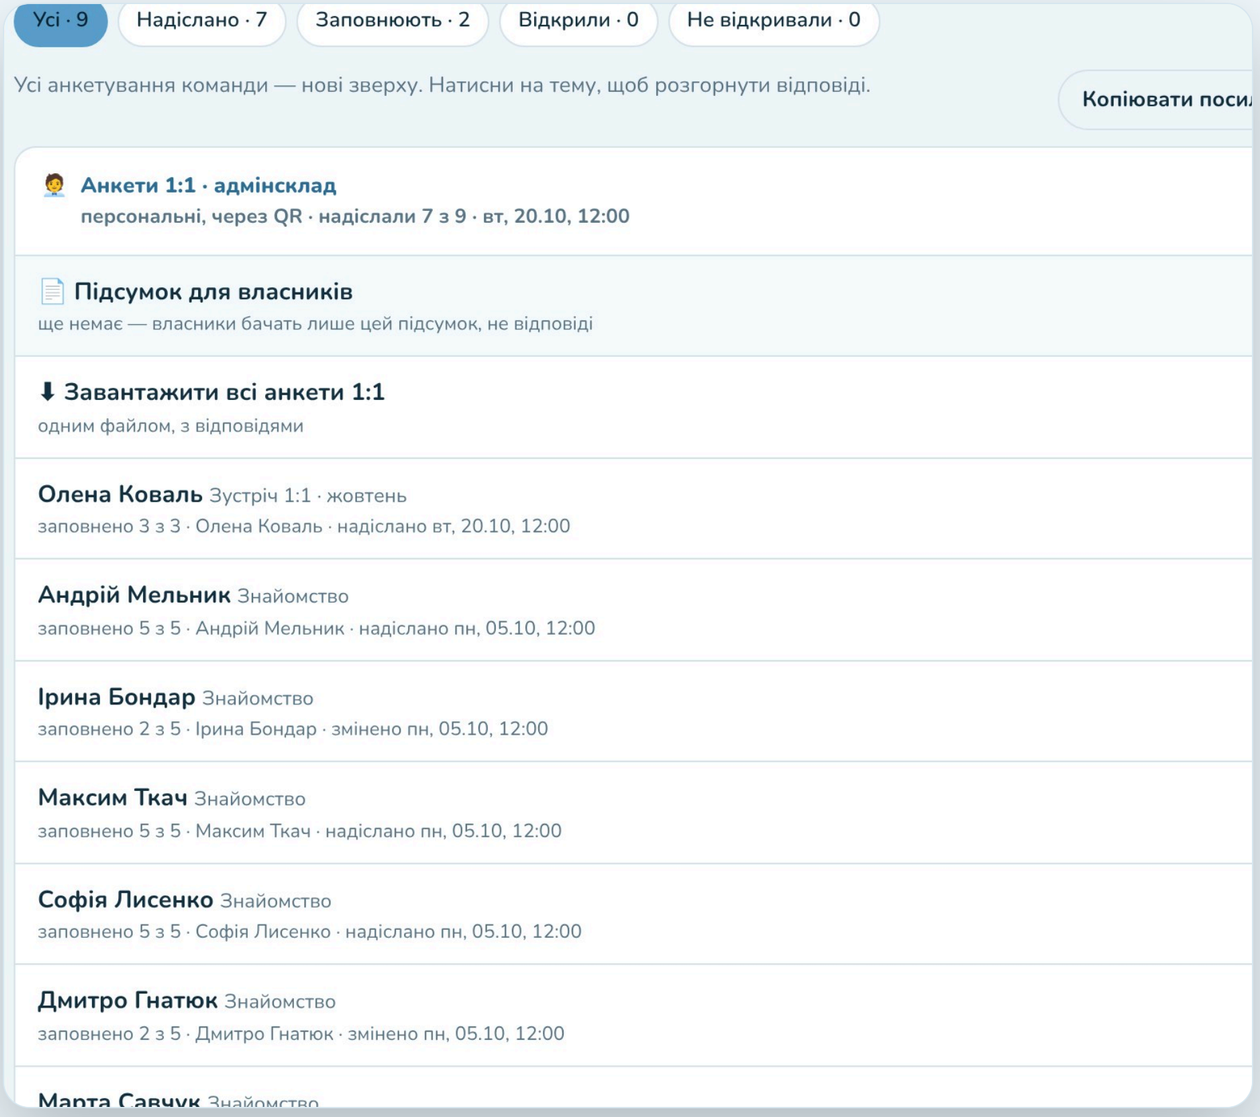

- Messages via the bot, no personal numbers
- The whole thread is kept in the card
- Replies and requests in one place

FORMS & SURVEYS

Hear everyone — and see the big picture

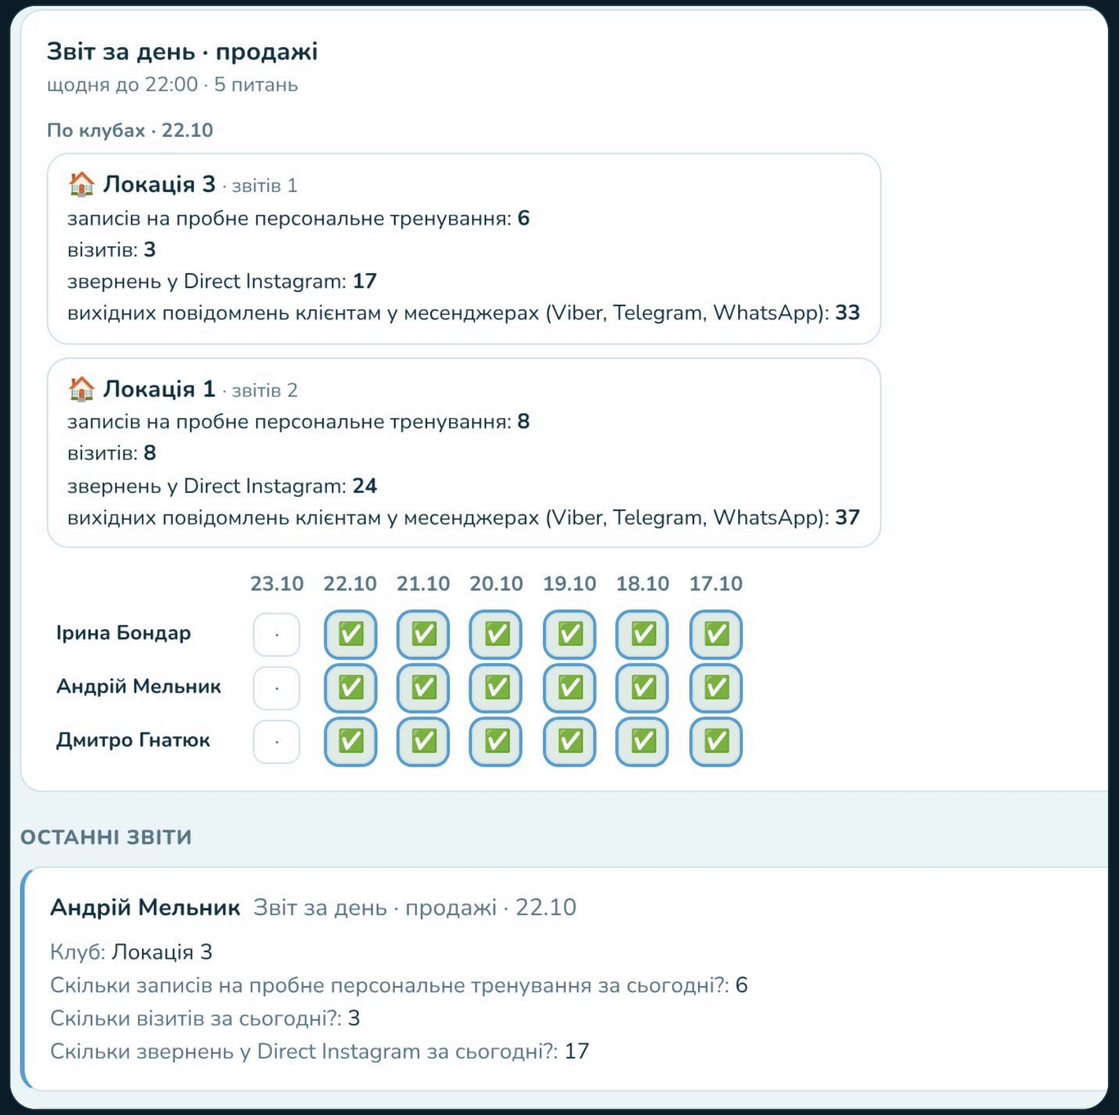

- One link — for the whole team or one person
- Answers save themselves, even offline
- Profile data lands in the card: team, location, contacts
- Search by people and teams, export to Word

REPORTS

Daily numbers — without chasing people in chats

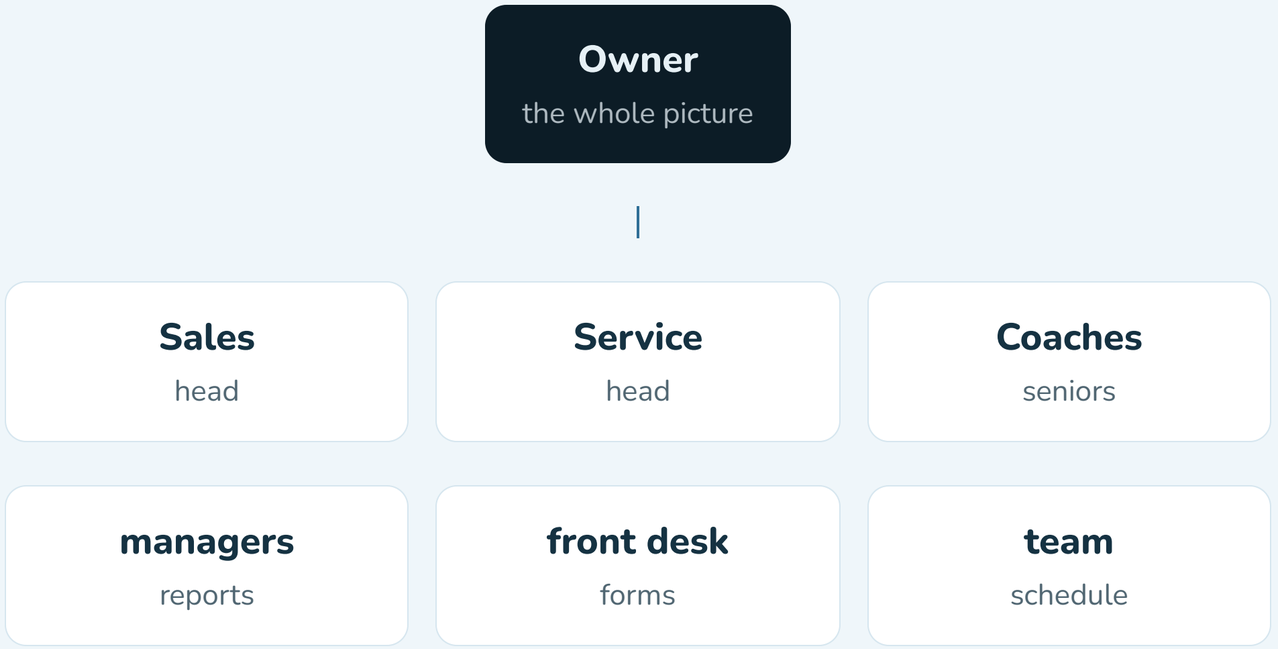

- A bot button and scheduled reminders
- Location is pre-filled, editable
- “Day off today” — and reminders stop
- Totals by team and location go to your CRM

STRUCTURE

Teams, managers, access

Everyone sees their part: staff their cabinet, managers their team, owners the whole picture.

SECURITY

Trust is part of the system

Private 1:1s

only the manager sees answers

Passwords & access

open once, then erased

Roles

everyone sees only their part

Nothing is lost

history is always kept

HOW WE WORK

From a conversation to a working system

01

Talk

we map your processes and pain points

02

Set up

structure, forms, reports for you

03

Launch

the team joins via the bot

04

Grow

we add more as the business grows

PapiCreate

Let me show it on your team

30 minutes: we walk through your processes and see what th
take over
